influence your IQ. How to Solve Spellrex Puzzles Learning how to solve Spellrex puzzles quickly and successfully takes some practice. Your mind searches for patterns. When you encounter a Spellrex puzzle, your mind immediately begins trying to fill in the blanks with the missing letters. You can use the following methods if you find the solution not readily apparent. Try Consonants 1. If the second letter is missing, try an r, or. 2. Try the double s if you have two blanks at the end of a word. 3. Try a double l, double n, or double t in the middle. Try Vowels 1. If you have a consonant followed by a blank, try one of the vowels (a, e, i, o, and u). 2. Put a vowel in a blank before or after double consonant such as ll, tt, or ss. 3. Remember that vowels often appear in combination like au or ea in many words. If you have two blanks together, try these combined vowels. Try Blends 1. If you have two blanks at the beginning of a word, try blends like st, br, or ch. 2. If your Spellrex contains two blanks at the end, try er. 3. Try different letter combinations as the beginning and end of the word for double blanks. Veteran word puzzle solvers also use some other skills to provide success: Sometimes the beginning and ending letters are enough to trigger recognition of the correct letters to go in other blanks. Try common prefixes (beginnings) and suffixes (endings) such as un, up, and re for blanks at the beginning of your Spellrex. Also, try suffixes such as ed, ion, and ing for ending blanks. Become familiar with lists of common words by word length. Many longer words begin, contain, or end with smaller words. For instance, betrayal, contains the words be and tray. Knowing this can help you identify letters that fit in missing letter blanks.
