

Bleeders

Bad money turns unforgettably murderous in the twenty-seventh novel of the long-running, award-winning Nameless Detective series. A simple case of blackmail gets lethally complicated when Nameless, Bill Pronzini's seasoned private-eye, exposes a nasty scam that involves junior accounts executive Jay Cohalan, his unhappy wife, and a mistress with a serious drug problem. It's the kind of case Nameless likes, because bleeders—the blackmailers, extortionists, small-time grifters, and other opportunists who prey on the weak and gullible sit near the top of his most-worthless-human-beings list. So he contemplates with pleasure the prospect of putting another one or two of these parasites out of commission, and then returning the \$75,000 in cash to its rightful owner. Nameless discovers, though, that he is not going to be able so easily to close his Cohalan file not when he finds his client face down in the middle of a four-poster bed with a bloody, powder-scorched hole behind the right ear. And only by a hair's breadth does Nameless himself escape a similar fate. Aggrieved, cut to the psychological quick by his close brush with death, Nameless embarks on a relentless hunt for his unknown assailant in San Francisco's shadowy underworld. There he encounters bleeders of every ilk like the loan shark Nick Kinsella, drug dealer Jackie Spoons, punch-drunk boxer Zeke Mayjack, and crankhead Charlie Bright before he tracks down his quarry. At a deserted backcountry road stop Nameless, packing his long-unused .38, attends to the last of a bad business and, in a climax as powerful as it is unexpected, finally confronts his own demons. He maybe even conquers them.
