

The Age of the Unthinkable (First Edition)

Why the new world disorder constantly surprises us and what we can do about it. Cooper Ramo puts forth a revolutionary new model for thinking about and thriving in this world of the unpredictable. After all, great historical shifts don't only produce losers. They also create a whole new case of historical champions, new fortunes, and ideas that can endure for centuries. Ramo explains precisely why our current way of thinking, and the policies that result backfire. Drawing upon history, economics, complexity theory, psychology, human immunology and the science of networks Ramo describes a landscape of inherent unpredictability and remarkable possibilities.
