

Cannabis: A History

An in-depth study of the most widely-used and controversial drug in the world today. To some its anathema, to others it provides relief from crippling pain; to others still, it is a legal anomaly and should be decriminalized. Whatever the viewpoint, and by whatever name it is known, cannabis -- or marijuana, hashish, dope, kif, weed, dagga, grass, ganga -- incites debate at every level. Its impact on the world's cultures and economies is undeniable. Dating back to the Neolithic period, the history of cannabis is a tale of medical advance, religious enlightenment, political subterfuge and human rights; of law enforcement and customs officers, cunning smugglers, street pushers, gang warfare, writers, artists, musicians and happy-go-lucky hippies and potheads. The author has used his links to drug law-enforcement agencies throughout the world in this impeccably researched social and cultural history of the most popular and controversial drug in the world.
