

Delusion and dream,: And other essays; (Beacon paperbacks)

Freud's long essay, an analysis of the German novelist Wilhelm Jensen's story *Gradiva*, is his first work to deal explicitly and systematically with literature and aesthetics, although he had commented at some length on *Oedipus Rex* and *Hamlet* in *The Interpretation of Dreams* (1900). In asserting that dreams have meaning, psychoanalysts are aligned with the ancients, a superstitious public and creative writers. Through the close analysis of a story that Jensen termed a Pompeiian phantasy, Freud considers the class of dreams that have never been dreamt at all--dreams created by imaginative writers and ascribed to invented characters in the course of a story. -- www.arts.cornell.edu
