

Eternal Peace and Other International Essays (Classic Reprint)

In 1795, during Washington's administration, just as our great American experiment in self-government had been inaugurated, Immanuel Kant published his memorable tractate on Eternal Peace. It was in many respects the most remarkable prophecy and program ever made of the day when the war drum shall throb no longer, and the battle flags shall be furled in the parliament of man, the federation of the world. The prophecy is never forgotten by those who are in earnest about having it fulfilled. The name of Immanuel Kant, greatest of modern philosophers, is honored in Europe and America alike as that of the preeminent philosopher of the peace movement. But few perhaps remember the words in his immortal essay which seem a special prophecy of the part which our republic seems destined to take in the promotion of the cause in which the great philosopher was a pioneer. If happy circumstances bring it about, writes Kant, that a powerful and enlightened people form themselves into a republic, which by its very nature must be disposed in favor of perpetual peace, this will furnish a center of federative union for other states to attach themselves to, and thus to secure the conditions of liberty among all states, according to the idea of the right of nations; and such a union would extend wider and wider, in the course of time, by the addition of further connections of this kind. It was a remarkable insight of Kant's that universal peace could come only with the universal republic. (Typographical errors above are due to OCR software and do not occur in the book.) About the Publisher Forgotten Books is a publisher of historical writings, such as: Philosophy, Classics, Science, Religion, History, Folklore and Mythology.
