

Life and Public Services of Rutherford (Classic Reprint)

Gk Dbless the man who invented a preface I He was a public benefactor, and ought to have a monument on Mount Olympus. It is such a sweet satisfaction to have some spot in a book where the author can be at home with his intimate friends, and out of the reach of intruders, and where a writer can say any thing he pleases without fear of being questioned by the public. It is also a good provision for the readers, as it furnishes a receptacle for all kinds of odds and ends for which there is no place in the body of the work, and in which, if there were a place for them, the general public would have no interest. A preface is a most convenient tiling. Some writers feel compelled to stride through their book on intellectual stilts, giving the impression that they are very tall men; and even the members of their own family would not recognize them without looking back in the preface, and observing how the writers behave, and how they appear, at home. Others set about their work with lungs inflated, and cheeks puffed out, to such an extent as to deceive the very elect with regard to their lateral proportions.(Typographical errors above are due to OCR software and dont occur in the book.)About the Publisher Forgotten Books is a publisher of historical writings, such as: Philosophy, Classics, Science, Religion, History, Folklore and Mythology.Forgotten Books Classic Reprint Series utilizes the latest technology to regenerate facsimiles of historically important writings.
