

Life Outside - The Signorile Report on Gay Men: Sex, Drugs, Muscles, and the Passages of Life

Popular Out magazine columnist Michelangelo Signorile investigates the hot-button issues confronting gay men today. Exhaustively researched, surpassingly perceptive.--New York magazine Life Outside bravely advances a critique of the attitudes and ideologies that have shaped the gay scene and merits the attention of a broad audience for its courage and informativeness.--New York Times Book Review A stunning expose. Gay men should be handed three things when they come out of the closet: a box of condoms, a videocassette of George Cukors The Women, and a copy of Life Outside.--The Advocate Michelangelo Signorile galvanized a generation of lesbians and gay men when he took on the closets of power in his 1992 classic Queer in America. Now, in Life Outside, he offers an expose of what he calls the cult of masculinity within contemporary gay male culture, while finding hope and renewal in other aspects of gay life. He reveals the origins of the current obsession in much of the gay community with an impossible physical ideal and explores the malevolent commercialization of gay sex. Life Outside also identifies another, more positive phenomenon in the gay male world. With the expansion of the gay movement, with more gays coming out--and remaining--in suburban, small-town, and rural America, the urban scene is no longer setting the standard for what it is to be gay in America. With the deghettoization and deurbanization of homosexuality, we find men who challenge long-held assumptions about being gay, relationships, and coping with growing older. With first-person accounts from men who are moving into midlife with pride and vitality, Signorile points the way for all gay men to face the passages of life with a new maturity.
