

## TERPSICHORE [Translated]

ABOUT THE AUTHOR: Herodotus was an ancient Greek historian. He has been called the Father of History since he was the first historian known to collect his materials systematically, test their accuracy to a certain extent and arrange them in a well-constructed and vivid narrative. The Histories his masterpiece and the only work he is known to have produced is a record of his inquiry (or historia, a word that passed into Latin and took on its modern meaning of history), being an investigation of the origins of the Greco-Persian Wars and including a wealth of geographical and ethnographical information. Although some of his stories were not completely accurate, he claimed that he was reporting only what had been told to him. Little is known of his personal history since ancient records are scanty, contradictory and often fanciful.
