

The open conspiracy and other writings

This volume contains H. G. Wells's 1928 work, *The Open Conspiracy: Blue Prints for a World Revolution*. Wells describes the book as a scheme to thrust forward and establish a human control over the destinies of life and liberate it from its present dangers, uncertainties and miseries. The text suggests that, thanks to scientific advancement, a world politically, socially and economically unified is being established by educated and influential people which could be the foundation of a world revolution aiming at universal peace. This fascinating and thought-provoking treatise will appeal to those with an interest in utopian literature, and it is not to be missed by fans and collectors of Wells's work. Herbert George Wells (1866 - 1946) was a seminal English writer whose notable works include *The War of the Worlds* (1897) and *The Time Machine* (1895). Many vintage texts such as this are increasingly scarce and expensive, and it is with this in mind that we are republishing this book now, in an affordable, high-quality, modern edition. It comes complete with a specially commissioned biography of the author.
