

Police State USA: How Orwells Nightmare is Becoming our Reality

The Founding Fathers wouldnt recognize America today. The God-given freedoms they championed in the Bill of Rights have been chipped away over the years by an ever-intrusive government bent on controlling all aspects of our lives in the name of safety and security. NSA wire-tapping and data collection is Orwellian in its scope. The TSA, BLM, and IRS are all jockeying for control of our lives. warrantless searches are on the rise and even encouraged in some communities. Free speech, the right to bear arms, private property, and freedom of religion all are under attack. The Constitution has been tossed on the same trash pile as the Bible. From traffic light cameras to phone tapping, from militarized police forces to targeting specific groups of people, the government is unfettered in its desire to control the American people. Police State USA chronicles how America got to the point of being a de facto police state and what led to an out-of-control government that increasingly ignores the constitution and exploits 9/11 security fears to justify spying on its citizens. Stunning new surveillance technology makes it easier to keep tabs on the people. The acquisition by police departments of major battlefield equipment emboldens officials to strong-arm those they should be protecting. The failure of the news media to uphold the rights of citizens sets the stage for this slippery slope. Police State USA tells how we might overcome and recapture our freedoms, as envisioned by the Founding Fathers.
