

## Why Am I Not Healed?

Thirty years ago, people believed that God could heal the sick, but struggled in their faith to believe He could heal sicknesses such as cancer. Today, people believe that God can heal cancer, but they struggle to believe He can heal dementia. The struggle to believe that God can heal a particular sickness, or a set of sicknesses, can relate to fear; fear of the aggressive nature of a particular disease can cause some people to struggle to believe that God's power can overcome it. Some sicknesses, such as Alzheimer's disease, can be regarded as a sickness that affects older people; as if somehow disease is ageist. In actual fact, sickness is due to a number of reasons, but the three major factors relating to sickness are: a bad diet, the fall of Adam and demonic activity. This book will investigate the type of sicknesses that God wants to heal, based on examples from the bible. Five specific miracles will be considered from the Old Testament, along with five miracles recorded in the New Testament. Therefore, we shall consider how God can heal: barrenness; skin diseases; terminal illnesses; mental health conditions and schizophrenia; paralysis; diseases caused by oppression, demonic activity and curses; viruses; epilepsy; blindness and birth defects; and the extraordinary miracles performed by Paul the apostle in the New Testament. It is my prayer that this book will encourage and strengthen your faith, no matter what sickness you may be facing today. God has an answer for you, which can be found in the bible. So do not fear, but maintain your trust in the one who can do immeasurably more than you can ask or think, according to Ephesians 3:20. This book can be used to help individuals understand the nature of sickness, what's behind it and how to deal with it. It can also help people who want to move out in healing, but do not know how to deal with what is behind some sicknesses.
